Overview

The USB to RS232 conversion cable makes it easy to connect USB and serial devices, allowing the serial devices to have plug-and-play, hot-plugging and other functions. It can be used to connect notebooks to various serial devices, suitable for communication with mini phones, digital cameras, MODEM, ISDN terminal adapters, LED control cards, 51 single-chip microcomputers

Not Supported

(STC11, 12C series industrial equipment) ARM and ARM9

Features

Single chip COB HL340 crystal oscillator 12M USB port to serial port communication

USB1.1/2.0 compatible solution

Built-in 128 byte TX / 512 byte RX buffer

support automatic handshake protocol

support Win95/98/98se/ME/2000/XP/win7 32bit 64bit /Vsita/supports full-speed USB data transmission protocol

anti-electromagnetic interference design
