

WEIPU Weipu network cable plug crystal head RJ45 waterproof connector plug

The RJ45F Ethernet cable waterproof connector converts the standard Category 5, Super Category 5, and Category 6 cables into dust-proof and waterproof through the shell, which can be used in harsh environments. The product does not need to be welded, which saves wiring and wiring time and improves work and production efficiency. Widely used in LED display equipment, closed-circuit monitoring systems, factory automation control, communication equipment, etc.
