

Mini LED DC2.5-30V Red Volt Voltage Meter Display Digital

P/N: 190906

Product Features:

- - The voltmeter use 0.36 inch digital tube display, with super small volume, area with only a coin similar
 - Connection is simple, just need to pick up two lines, a joint reverse protection, then do not burn
 - Starting voltage is low, only 2.50 V, can correct measurement
 - To achieve the best measurement precision, the voltmeter will measure the voltage according to the different automatic moving the position of the decimal point
 - Can be used for measuring 18650 cell phone lithium battery nimh battery and other battery voltage, and motorcycle automobile battery voltage
 - Can be used in all kinds of voltage measurement purposes

Technical Parameters:

- Power supply: don't need the power supply, direct use of the test voltage as a power supply
- Measurement range: DC2.50 - 30V
- The minimum input: 2.50V
- The maximum input: 30V
- Operation temperature: -10 ~ 65 centigrade
- Display mode: three 0.36 LED digital tube
- Display color: Red
- update rate: about 500 ms/time
- Permissible error: 1% (+ / - a word)
- Physical size: 23 x 15 x 10 mm (L X W X H, not including installation ear)
- Leadwire length: 15 cm
