

NE555 frequency adjustable, pulse generate module

P/N: 200230

1. Onboard NE555 chip
2. Single channel signal output, output duty ratio is about 50% of square wave.
3. Onboard can adjust resistance, adjust resistance can control output frequency.
4. Working voltage: 5~12V
5. Size: 29(mm)x12(mm)
