

Model: JD1912-1 / 181116

Product Description

Adjustable steering lights flicker frequency, the use of advanced SMD chip technology
Automatic short circuit protection
Automatic overload protection
Reverse polarity protection automatically
Allowing the bulb more stable job
For 3 frequency, faster twist counterclockwise, clockwise twist slow

Product parameters:

Size: About 3.5cm Length*3.5cm Width*2.7cm Height
Voltage: DC12V
Flicker Frequency: 50C / m-200C / m
Power: 2x 21W + 1x 3.4W

Note:

1. When the installation must be on the correct foot position otherwise it can not work.
2. If you change the flasher, four bright lights together, you need to turn off the turn signal light of the dashboard!

**Adjustable the light
fast flash or slow flash**

1. Anticlockwise turn faster
2. Clockwise turn slowly
