

KE0105 KEYES LED light-emitting diode string driver module

Overview:

This LED strip contains LED lights in five colours: white, blue, yellow, green and red. The length of the strip is 6m and has an LED every 100mm, with a total of 60 LED's

To be used with a 5VDC supply and the output is boosted to 12V

LED strip parameters:

Voltage: 12VDC

Current: 130mA

LED Count: 60

Colours: white, blue, yellow, green and red

Length: 6m

LED Drive Board parameters:

Voltage IN: 5VDC

Voltage OUT: 12VDC
