## KE2005 KEYES white LED module

Parameters:

Working Voltage: 3 ~ 5VDC
Colour: Red
Size: 34x22x12mm.

PINOUT Instruction:

Sample Code:

```
int led = 3;

void setup()
{
  pinMode(led, OUTPUT);
  //Set Pin7 as output
   }

   void loop()
   {
   digitalWrite(led, HIGH); //Turn off led
   delay(1000);
   digitalWrite(led, LOW); //Turn on led delay(1000);
   }
```

Result:

The LED will flash on for one second, then off for one second, repeatedly and alternately.
If it doesn't, make sure you have assembled the circuit correctly and verified and uploaded the code to your board.
