## KE2054 KEYES red LED module

Parameters:
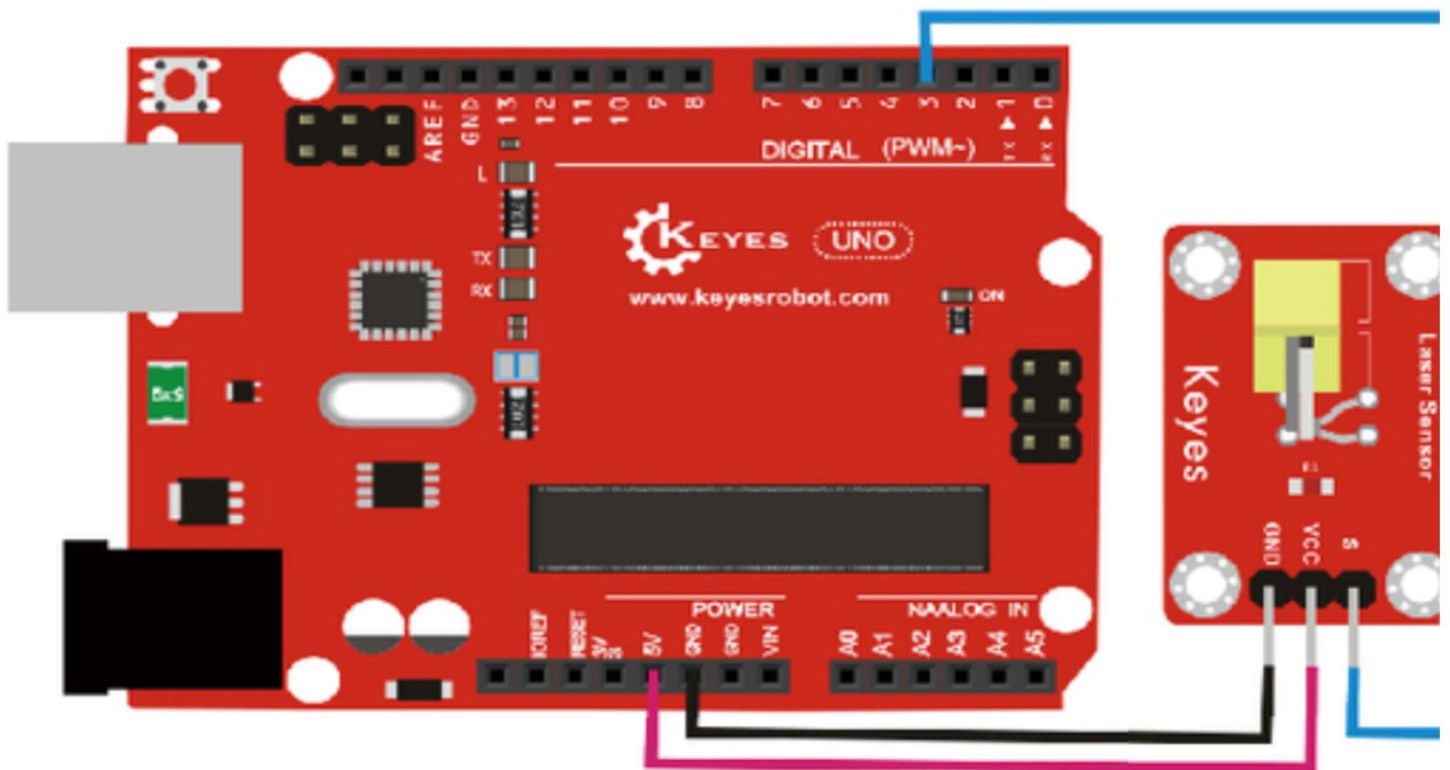

Working Voltage: 3 ~ 5VDC
Colour: Red
Size: 34x22x12mm.

PINOUT Instruction:

Sample Code:

```
int led = 3;
void setup()
{
  pinMode(led, OUTPUT);     //Set Pin7 as output
}
void loop()
{    digitalWrite(led, HIGH);   //Turn off led
        delay(1000);
        digitalWrite(led, LOW);     //Turn on led
        delay(1000);
}
```

Result:

The laser will flash on for one second, then off for one second, repeatedly and alternately.

If it doesn't, make sure you have assembled the circuit correctly and verified and uploaded the code to your board.
