

## Model: SCT036T

### Characteristic:

Compatible to foreign similar products completely,  
built-in transient voltage suppressor to protect.

Purpose: Applicable for the current measuring monitoring and  
protection of AC motor lighting equipment, air compressor and so on.

Mechanical strength: The number of switching is not less than 500  
times(Test at 25)

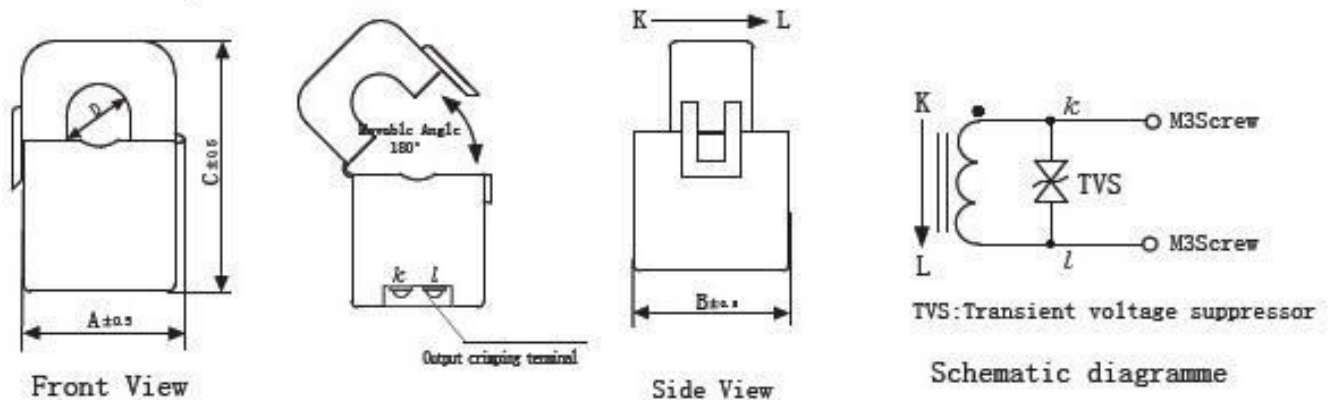

Fire resistance property in accordance with UL94-Vo

Work temperature: -20°C~+50°C

Storage Temperature: -30°C~+90°C

### Outline size diagramme:(in mm)

### Basic technical parameter table:

Rate input current	Output current volatge	Linearity	Transformation ratio	Installation size(mm)	Weight
600A	0.1A/1A/5A	±3%	—	57×40.5×91	300g
Work frequency	Output type	Dielectric strength			
50Hz-1kHz	current	primary/secondary 2500V AC/min 5mA			

### Attention:

If the customer request custom make, please consult the technical department.
