

## Soldering Station 2005

.....New Range.....

The 2005's Intuitive Logic Interface controls temperature more precisely and more efficiently for the new lead-free soldering requirements.

The fully computerized 2005 works the way you work. It's what it's all about. Performance where and when you need it.

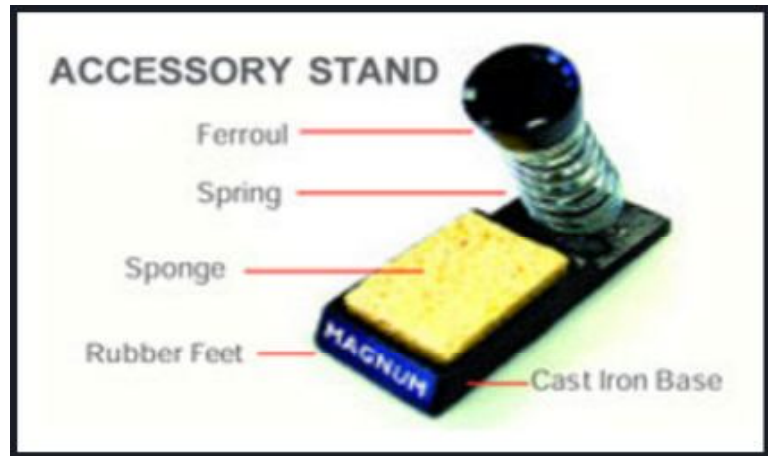

The first in the next generation of soldering solutions from Magnum.

### Features

- Supplied with the soldering iron 1002, 24V 80W.
- Microprocessor Digital Control.
- PID temperature control set for the least overshoot.
- Constant fault cheching.
- Electronic serial number.
- Service warning every 1000 hours of operation.
- Pre-set temperatures.
- Earthed hand pieces
- Temperature rang is between 150°C & 450°C with 2 fixed temperature settings.
- Temperature is accurate within +5°C of set temperature
- Cast Iron Iron stand

### Technical Data

Input	220V-240V 50/60Hz AC 90W
Power	0.63 A
Output	24V AC 3A
Temperature	150°C to 450°C +5°C
Dimensions	L125 x W125 x H100mm
Weight	2.1Kg
