

# Adjustable clamping/drill vice

**TorkCraft™**  
Tools for every job

**Jaw width:** 78mm

**Opening:** 50mm

**Horizontal rotation:** 360°

**Tilt:** 0-90°

## Application:

The vice can be fastened with the supplied screw onto the end of a workbench with a table thickness less than 50mm. The vice is used to secure a workpiece within its jaws to allow work to be done on it.

The vice includes a lockable ball joint to allow the vice to be rotated and tilted. An adaptor is supplied to hold a portable drill with a collar diameter of Ø43mm.
