

RS422 mutual conversion TTL

Model: YL-128 / 170251

- Description:**
- 1 RS422 interface, two-way communication. A B Y Z super long transmission 1000 meters
 - 2 The module has 15KV ESD protection.
 - 3 Add 10 ohm current limiting overcurrent protection resistor on the board.
 - 4 module with TVS diode. Anti-lightning, anti-spike voltage.
 - 5 The module has a 120 ohm terminating resistor, which can effectively reduce long-distance communication echo interference.
 - 6 There are power indicator lights and data transceiver indicators. The data status is unobstructed.
 - 7 Module TTL side Use 5v DC power supply RXD TXD is compatible with 5V logic signal.
 - 8 module uses the original imported MAX490 chip, the stability and communication speed far exceed domestic products, up to 2.5MBPS.
 - 9 module size: 5.0cm*2.7cm
