

This item is used to farad capacitor of car. If without farad capacitor to protect automobile battery, the damage rate of battery is quicker than normal rate. It can make a steady voltage, decrease the waste of battery. It has resistance or activity monomer balance function.

Specification:

Color: Blue

Material: Aluminum

Size: About $215 \times 69 \times 38\text{mm}$ / $8.5 \times 2.7 \times 1.5$ inch

Serials connection rate voltage(V): 16

Serials connection rate capacity(F): 83

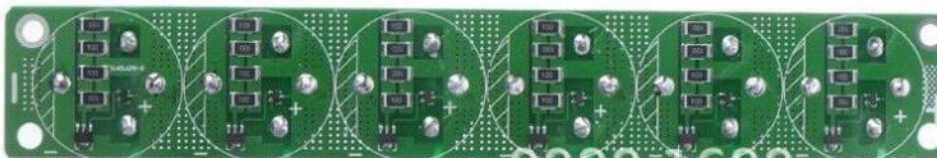

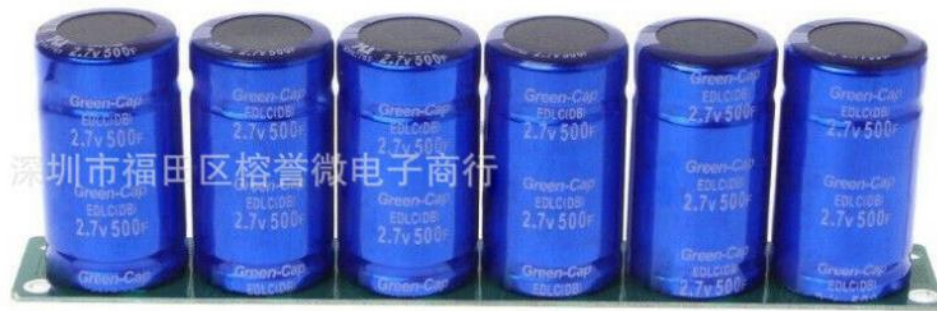

Purpose: Help user to optimize the application program of reserve power supply.
Over pressure output signal.

Cycle life of charge and discharge electric is up to 100 million times or 10 years

It has resistance or activity monomer balance function.

Include: 1 set(6 pcs) \times farad capacitor board
