

## DC1500V Fuse Link Parameters

Product Item	DNPV1085
Rated Current	2A-25A
Rated voltage	DC1500V
Breaking Capacity (kA)	20kA
Standard	IEC 60269-6 GB/T 13539.6
Applications	solar system

### What is the DC fuse definition?

Photovoltaic DC fuse link are mainly applied in PV solar system, used to protect solar cell panels. DC1000V and DC1500V. When inspected and analysis the fault components ,the DC voltage fuse link have no effect on other working components.

Size diagram is as follows:
