

## KE0003 keyes NANO for arduino development board red environmental protection

### Overview:

#### ARDUINO NANO Development Board

The ARDUINO NANO development board is our latest easy-to-use open source controller. There are no major changes in hardware compared to the official Arduino Nano. In appearance, we replaced blue with red to give you a new experience.

### Specification:

- 14 digital input/output ports D0~D13
- 8 analog input ports A0~A7
- 1 pair TTL level serial port transceiver port RX/TX
- 6 PWM ports, D3, D5, D6, D9, D10, D11
- Using Atmel Atmega328P-AU microcontroller
- Support USB download and power supply
- Support external 7-12V DC power supply
- Support ISP download
