# KS0470 Keyestudio 4WD BT Robot Car V2.0 Kit for Arduino

Description:

The popularity of Maker Education has resulted in a variety of Maker products, some of which are combinations of electronic components and modules, and some are novel and innovative products.

The 4WD multifunctional smart car newly upgraded by the Keyestudio Group is one of the most popular categories: programming robots.

It is not only beautiful in appearance, but also powerful in function.Except for the commonly used functions of tracking, obstacle avoidance, remote control, etc., a facial expression is added too, you can DIY your own cute expression, amazing! If you think it's not enough, you can add other sensors to complete your exploration journey.
