

KEYESTUDIO Module: MD0237

LOGIC LEVEL CONVERTER MODULE 3V-5V // 5V-3V, BI-DIRECTIONAL TTL

Description:

2 channels of high-voltage (5V) logic and low-voltage (3.3V) logic bilateral switching
 Module is compatible with the breadboard, it can be put on the breadboard directly
 The module is compatible with the bread plate, can be directly plugged into the breadboard use

Features:

- Instructions for use: [high voltage is 5V low voltage of 3.3V for example]
- HV 5V supply
- LV 3.3V power supply connection
- GND with negative power, two power commons
- RXI input 5v TTL, in RXO 3.3v TTL output
- TXI input and output 3.3V TTL, TXO input and output 5V TTL, TXI and TXO bi Huzhuan
- Size: 15.5 x 16 x 11.5mm
