

MT660 - Temperature Probes

The MT660 General Purpose Probe can be used on all Major Tech type K digital thermometers including MT1000/MT1800 Series DMM's. Range up to +250°C. Exposed thermocouple with PTFE Insulation for general purpose use in heating and refrigeration industries, including radiator fan, water and air temperatures.

MODEL & RANGE	-40°C	0°C	100°C	200°C	300°C	400°C	500°C	600°C	700°C
MT660 Wire Probe	[Bar chart showing range from -40°C to 250°C]								
MT670 Surface Probe	[Bar chart showing range from -40°C to 500°C]								
MT672 Oven Probe	[Bar chart showing range from -40°C to 450°C]								
MT675 Surface Probe	[Bar chart showing range from -40°C to 500°C]								
MT680 Air Probe	[Bar chart showing range from -40°C to 300°C]								
MT685 General Purpose Probe	[Bar chart showing range from -40°C to 650°C]								
MT690 Surface Probe	[Bar chart showing range from -40°C to 500°C]								
MT690 Air Probe	[Bar chart showing range from -40°C to 250°C]								
MT690 Liquid Probe	[Bar chart showing range from -40°C to 650°C]
